

Fatty acids to mitigate methane emissions in ruminants

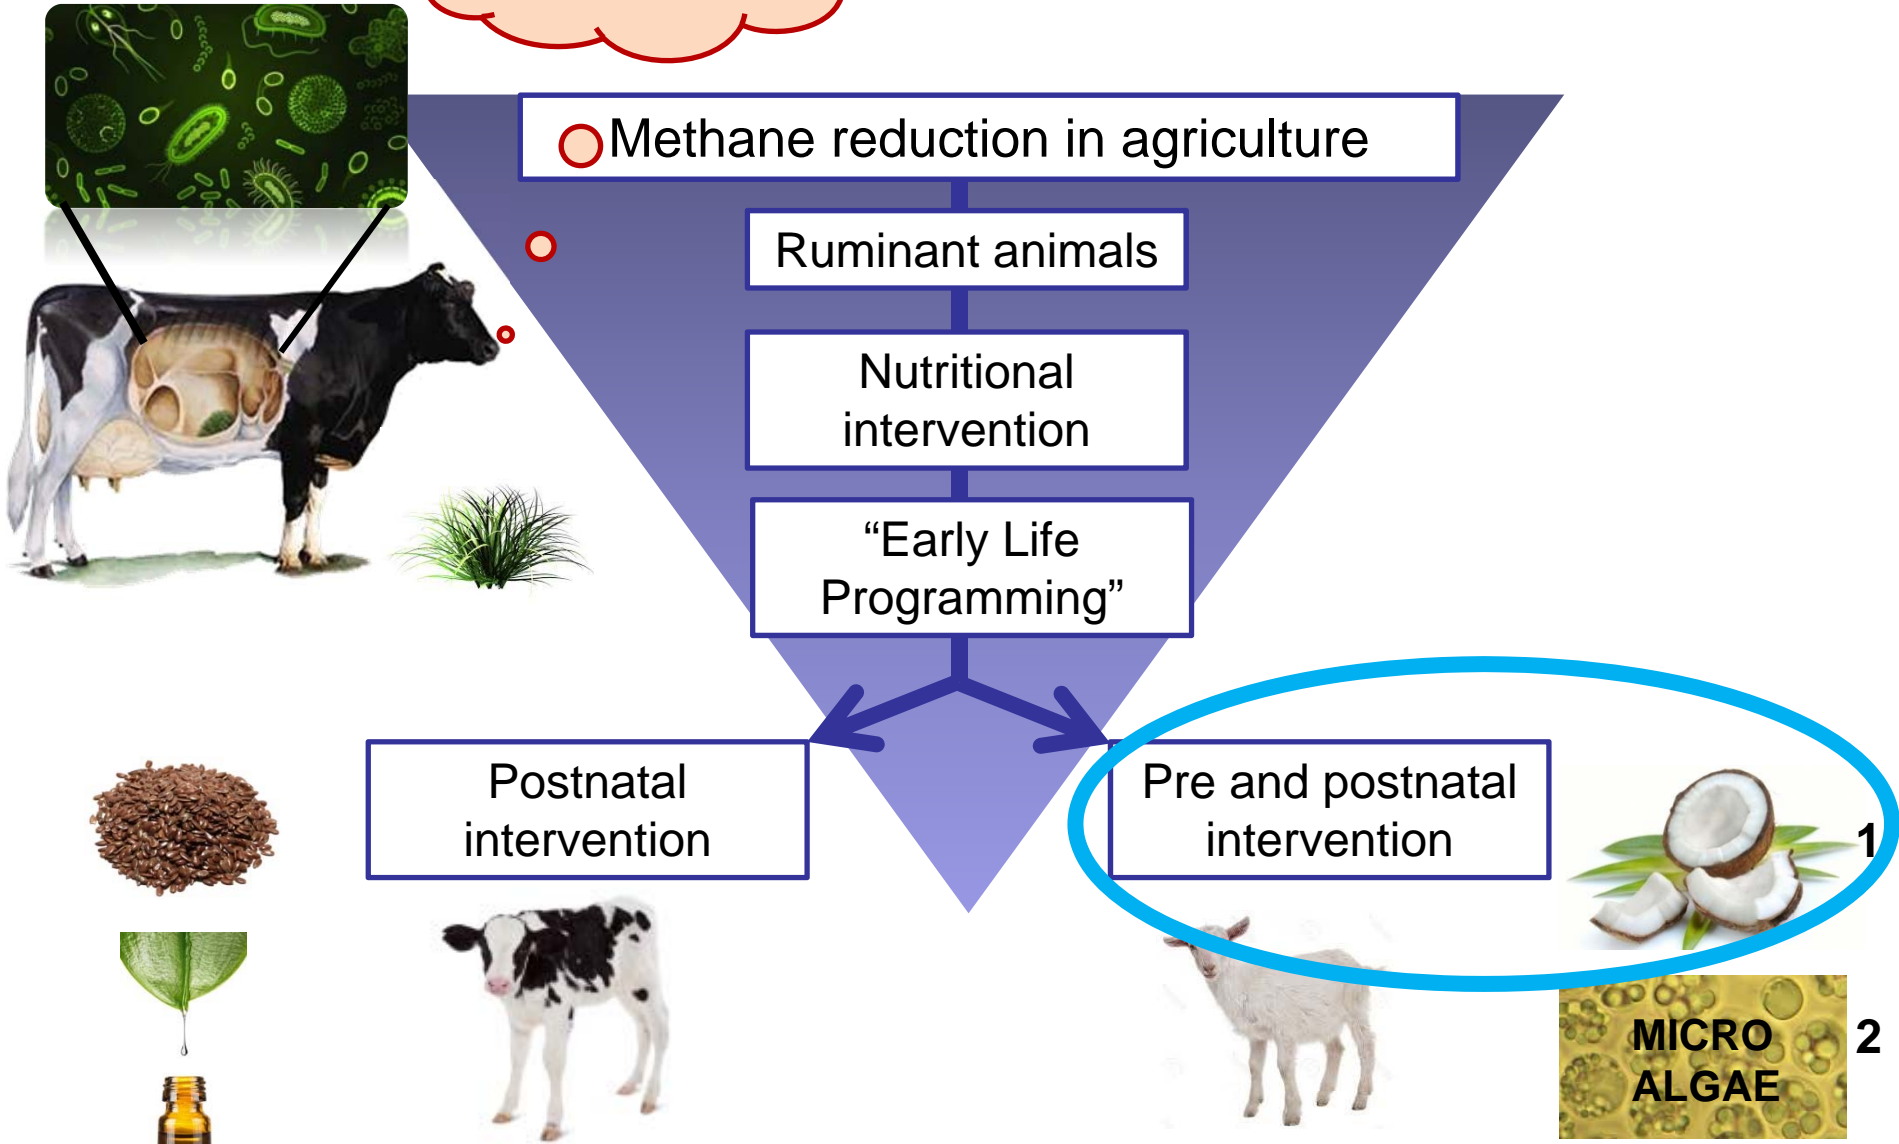

Sieglinde Debruyne
PhD student

TOPIC AND HYPOTHESIS OF PhD

methane

GOAT TRIAL

PRENATAL TREATMENT
Last 3 weeks of dry-off

POSTNATAL TREATMENT
Birth → 2 weeks after weaning

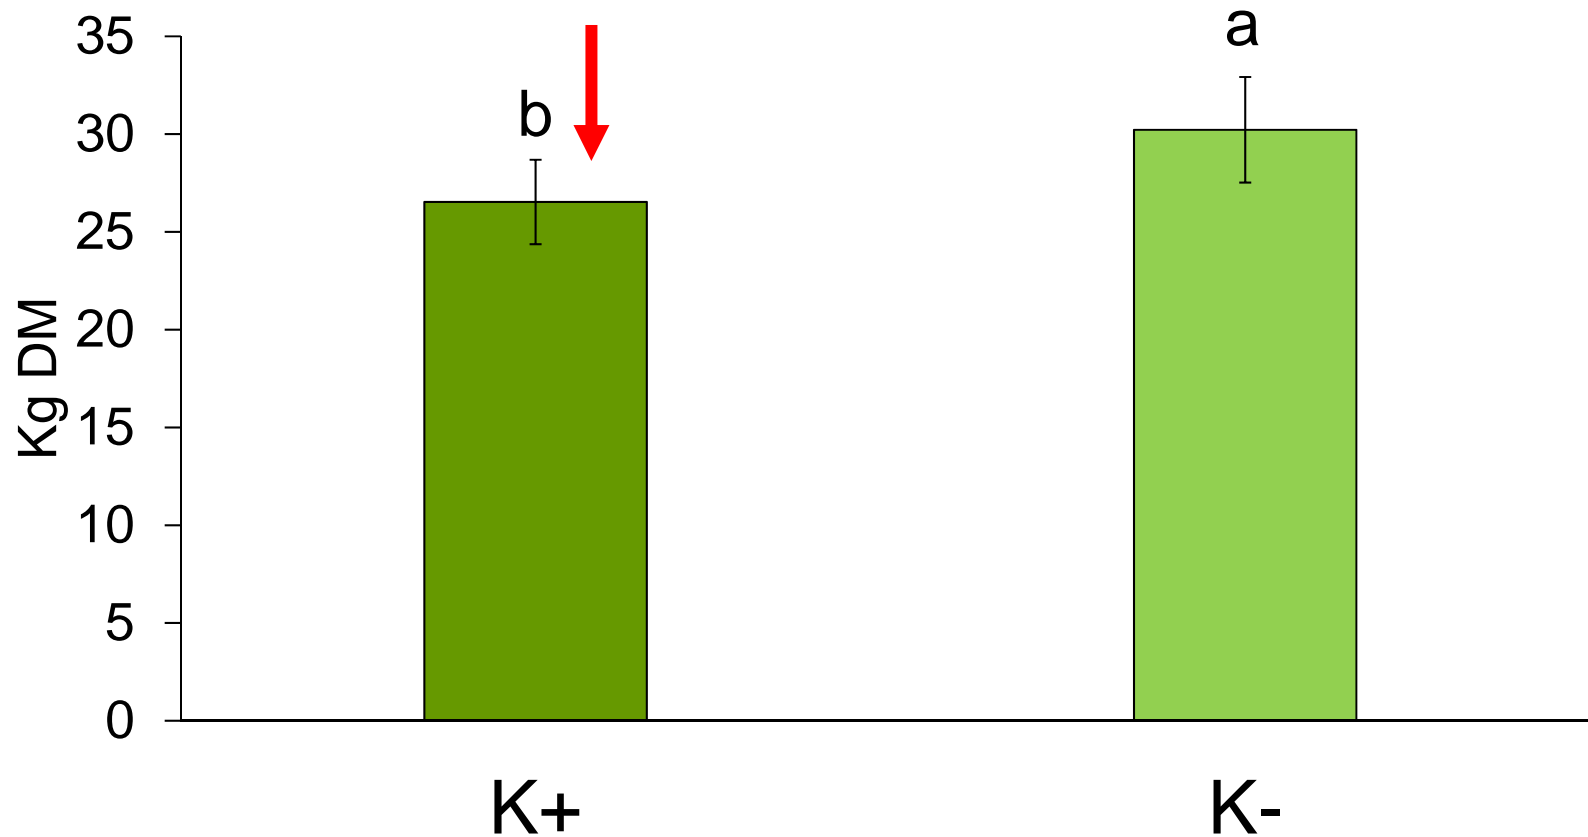

- KIDS**
- MR intake
 - Growth
 - Methane and VFA
 - Papillae development

Supplement=
non-esterified saturated medium chain fatty acids from coconut oil
(47% C12:0, 18.5% C14:0)

Sieglinde Debruyne

Results: Milk replacer intake

Negative postnatal treatment effect:
 $p=0.004$

Error bars represent standard deviations

Results: growth

	DOE +		DOE -	
Parameter	Kid +	Kid -	Kid +	Kid -
Daily growth until weaning: 9 weeks (g/day) (Kid effect p=0,0005)	175,7	216,6	177,7	215,0
Weaning weight (kg): 9 weeks (Kid effect p= 0,0025)	15,18	17,72	15,34	17,52
Weight at 12 weeks/ 3 months (kg) (Kid effect p =0,0065)	21,71	24,63	20,99	23,67
End weight: 6 months (kg) (Kid trend p= 0,089)	31,86	33,32	29,15	32,28

Methane measurements: *in vitro* incubations

- Fresh rumen fluid by oesophageal stomach tube and vacuum pump
- Mixed with phosphate bicarbonate buffer (1:4 ratio)
- 200 mg grass silage
- CO₂ atmosphere
- Incubate 24h (39°C, shaking)

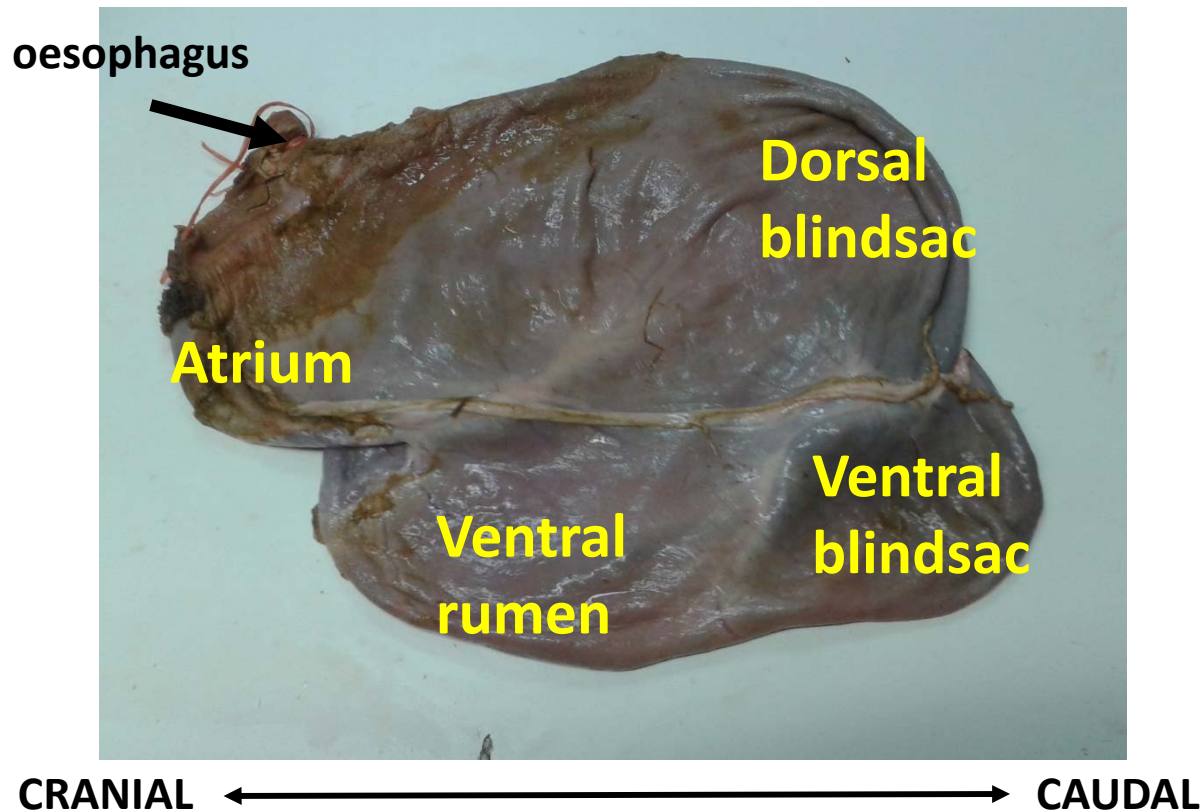

- pH, gas measurements and VFA measurements (gas chromatography)

Results: *in vitro* incubations

	Age	Abs. CH ₄	Total VFA	CH ₄ /total VFA
TREATMENT PERIOD	1 MONTH	D+K+ ↓	D+K+ ↓	D+K+ ↓ -81%
NO TREATMENT	6 MONTHS <u>PROGRAMMING</u>	D+ ↓	✘	D+ ↓ -25%

Results: papillae development

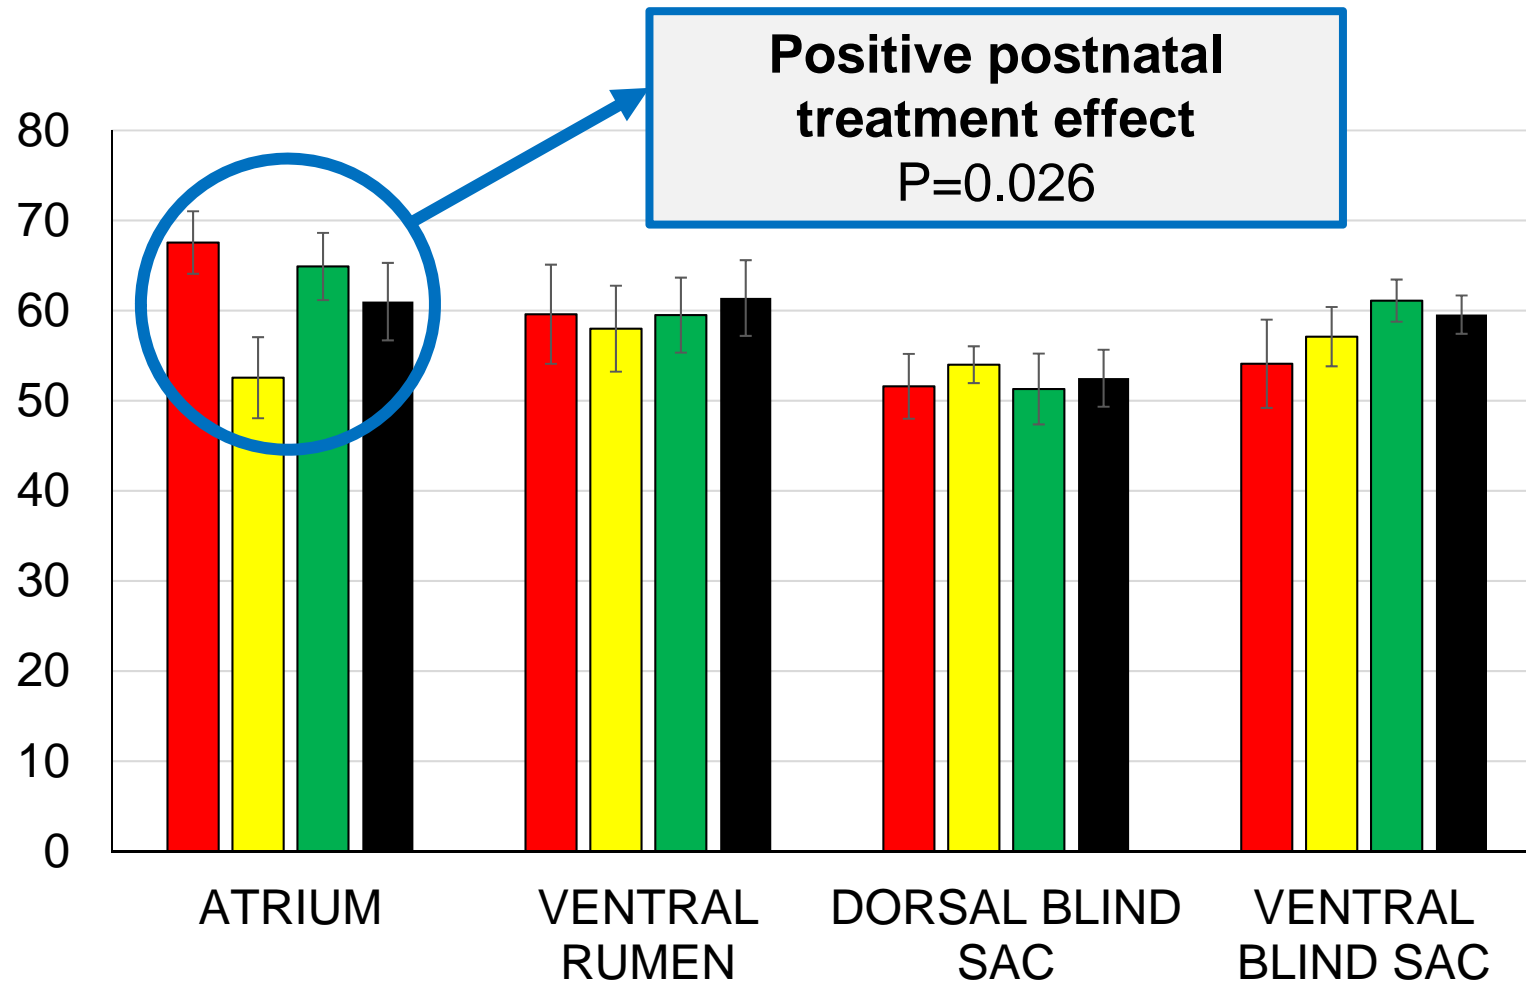

- 6 months old
- Papillae development: 4 zones in the rumen

- Density (number/cm²)
- Length
- Width

Results: papillae DENSITY

Discussion preliminary results goat trial

APPROX. 4 MONTHS AFTER POSTNATAL TREATMENT STOPPED...

- Prenatal treatment effect: lower absolute CH₄ (-23%) and lower CH₄/total VFA (-25%)
- Postnatal treatment effect: differences in papillae development (density, length and width)

HOWEVER

Negative effects of postnatal supplementation of coconut MCFA:

- Feed intake
- Growth and body weight
- Fermentation capacity in the rumen (total VFA)

Future investigations

- Microbial community structure
 - Abundance and diversity of main microbial groups
 - Activity of methanogens

Sieglinde Debruyne

Thank you
