

## Table of contents Refresher course Chemistry

### 1. Atoms, Ions and Molecules

- 1.1. Composition of an atom
- 1.2. Molecules and Ions

### 2. Structure of an Atom

- 2.1. Electron configuration and Orbitals
- 2.2. The quantum numbers
- 2.3. Orbital shapes
- 2.4. The Pauli principle
- 2.5. The Aufbau principle

### 3. Periodic Table of Elements

- 3.1. Blocks
- 3.2. Metals and non-metals
- 3.3. Atomic radius
- 3.4. Ionisation energy and electron affinity

### 4. Structure of a Molecule

- 4.1. Chemical bond
- 4.2. Electronegativity
- 4.3. Lewis structure
- 4.4. Valence shell electron pair repulsion model

### 5. Mass Relationships in Chemical Reactions

- 5.1. Atomic mass
- 5.2. The molar mass
- 5.3. Percent composition of compounds
- 5.4. Chemical reactions and chemical equations
- 5.5. Stoichiometric calculations : amounts of reactants and products
- 5.6. Calculations involving a limiting reactant

### 6. Reactions in Aqueous Solutions

- 6.1. Properties of aqueous solutions
- 6.2. Precipitation reactions
- 6.3. Acid-base reactions
- 6.4. Oxidation-reduction reactions
- 6.5. Concentration of Solutions
- 6.6. Acid-base titrations

### 7. Practical Lab Exercises

- 7.1. Volumetric Analysis
- 7.2. Chemical reactions
