

Table of contents Refresher course Mathematics

Chapter 1: Arithmetic of whole numbers

1.1. *Addition, subtraction, multiplication and division*

1.2. *The BODMAS rule*

1.3. *Fractions*

- Introduction
- Expressing a fraction in equivalent forms
- Addition and subtraction of fractions
- Multiplication of fractions
- Division by a fraction

1.4. *Percentage, percentage change and ratio*

Chapter 2: Algebra

2.1. *What is algebra?*

2.2. *Substitution and formulae*

2.3. *Powers or indices*

- The laws of indices
- Negative powers
- Square roots, cube roots and fractional powers
- Scientific notation

2.4. *Simplifying algebraic expressions*

- Multiplying algebraic expressions
- Removing brackets

2.5. *Factorisation*

- Factorising simple expressions
- Factorising quadratic expressions

2.6. *Algebraic fractions*

- Cancelling common factors
- Operations with algebraic fractions
- Partial fractions

2.7. *Transposing formulae*

2.8. *Solving equations*

- Solving linear equations
- Solving simultaneous equations
- Solving quadratic equations

2.9. *Sigma notation*

Chapter 3: Functions and graphs

3.1. What is a function?

- Definition
- The inverse of a function

3.2. The graph of a function

- The x-y plane
- Plotting the graph of a function
- Piecewise function
- Solving equations using graphs
- Solving simultaneous equations graphically

3.3. Dependent and independent variables

- Dependent and independent variables
- The domain and range of a function

3.4. The straight line

- The equation of a straight line
- The straight line graph
- The gradient and intercept of a straight line
- Finding the equation of a straight line from its graph
- Tangents to curves

3.5. The exponential function

- The exponential constant
- The exponential function
- The negative exponential function

3.6. Logarithms

- What is a logarithm?
- The laws of logarithms
- Bases other than 10 and e
- The logarithm function
- Link between the logarithm and exponential function
- Solving equations involving powers
- Solving equations involving logarithms

Chapter 4: Measurement

4.1. Introduction

4.2. Units of length

4.3. Area and volume

4.4. Degrees – Radians - Measuring angles in degrees and radians

4.5. Areas of common shapes and volumes of common solids

4.6. Units of mass

4.7. Dimensional analysis

Chapter 5: Matrices

5.1. What is a matrix?

- Definitions
- Some particular types of matrices

5.2. Addition, subtraction and multiplication of matrices

- Addition and subtraction
- Multiplying a matrix by a number
- Multiplying matrices

5.3. The inverse of a (2x2) matrix

5.4. Using the inverse matrix to solve equations

Chapter 6: Calculus

6.1. Differentiation

- The gradient function
- Differentiation: notation and terminology
- Linearity rules: Differentiation of a function multiplied by a constant
- Linearity rules: Differentiation of the sum or difference of two functions
- The product and quotient rule
- The chain rule
- Higher derivatives

6.2. Integration

- Integration as the reverse of differentiation
- Linearity rules: the integral of a constant multiple of a function
- Linearity rules: the integral of the sum or difference of two functions
- Definite integrals
- Areas under curves
- Integration by parts
- Integration by substitution
- Integration by partial fractions
