

HOW CAN PUBLICATION METRICS BE TAKEN INTO ACCOUNT WHEN CHOOSING A JOURNAL

Damien Decorte, 2022-11-10

WHY DO WE PUBLISH?

WHY DO WE PUBLISH?

4 core functions of scholarly publishing:

1. Registration

proving who was the first to make a certain scientific discovery or claim

2. Certification

establishing validity (often through a formal peer review process)

3. Dissemination

making the findings accessible

4. Preservation

ensuring that findings are accessible for the long term

WHY DO WE PUBLISH?

4 core functions of scholarly publishing:

- 1. Registration proving who was the first to make a certain scientific disconline.
- 2. Certification establishing validity (often through a formal review process)
- 3. Dissemination making the findings accession.
- 4. Preservation ensuring that fin accessible for the long term

WHY DOES THE JOURNAL MATTER?

- Reputation, visibility
- Quality label
- Expression of ambition
- Funding

OUR SCOPE TODAY: A1 PUBLICATIONS

Definition of "A1 article" (according to BOF regulation):

- Article (or proceedings paper,...)
- Web of Science indices :
 - 'Science Citation Index' (SCIE) -> A1
 - 'Social Science Citation Index' (SSCI) -> A1
 - 'Arts and Humanities Citation Index' (AHCI) -> A1
 - 'Emerging Sources Citation Index' (ESCI) -> NOT A1

(Biblio: classification | (re)search tips (ugent.be)

JOURNAL METRICS

Impact Metrics

Metrics focused on the citation impact of the journals

- Total Citations
- Journal Impact Factor (JIF)
- Journal Impact Factor Without Self Cites
- JIF ranking (Q1, Q2,... / percentiles)

Normalized Metrics

Metrics that have been adjusted mathematically to a particular context

- Article Influence Score (AIS)
- AIS ranking (Q1, Q2,... / percentiles)
- (Normalized) Eigenfactor
- **–** ...

JOURNAL METRICS ARE UNDER DEBATE

- Impact factors can be manipulated (self citation)
- Impact factors vary with research area
- The quality and impact of articles within the same journal can differ greatly
- What is important, is the content of the article, not the status of the journal.
- The indicator is less important than the goal itself: high-quality research.
- Restraint should be practiced in the use of journal metrics in individual evaluations

https://www.ugent.be/en/research/research-strategy/evaluation/indicators.htm

TWO TOPICS IN THIS PRESENTATION

1. FEB quality measure for publications, based on AIS

2. JIF

1.FEB QUALITY MEASURE FOR PUBLICATIONS

- Established in 2017 by the Scientific Research Committee
 (CWO) and the Faculty Council
- Based on the average Article Influence Score (AIS) of the last five years for each journal within its WOS-category (categories).
- Points are assigned to WOS-journals, ranging from 1 to 20.

Research information for staff

https://www.ugent.be/eb/en/information-for-staff/research.htm

Research Performance

→ PhDs (NL)

→ Publications

Research Performance: Publications

Each year, the Faculty of Economics and Business Administration calculates a rating of the research output of its research groups based on documented calculation principles.

→ Summary of these calculation principles

For the financing of the university (BOF-key) and for the measurement of the publication output at the faculty-level, a correct registration of all scholarly publications in the academic bibliography Biblio is important.

→ Some important considerations when registering publications in Biblio

For the measurement of the A1/ WOS publications at the faculty level, points are assigned to WOS-journals. These points are based on the average Article Influence Score of the last five years for each journal in its relevant WOS-category, and on the ranking each journal takes based on that average within its respective category.

- → Consult a list of the relevant journals and their points:
 - → sorted alphabetically by journal name
 - → sorted alpabetically by Web of Science Category

List of A1 journals - ordered by name

TWO TOPICS IN THIS PRESENTATION

1. FEB quality measure for publications, based on AIS

2. JIF

2. JOURNAL IMPACT FACTOR (JIF)

 JIF is often used as a reference in international academia (especially JIF ranking quartiles Q1, Q2, Q3, Q4)

 JIF is often used as a reference in the evaluation of academic CV (funding, recruitment selection,...)
