

DruQuaR kindly invites you to the seminar:

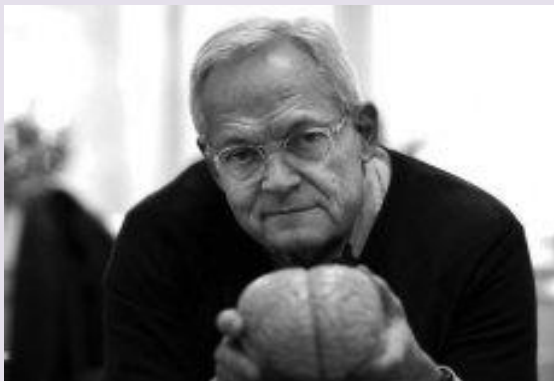

# Kinetics of blood-brain transfer of molecules: From passive diffusion to active transport

## Prof. Dr. Albert Gjedde

Dept. Neuroscience and Pharmacology - University of Copenhagen

### 25 August 2015 at 15h00

Seminar room 2 – Faculty of Pharmaceutical Sciences

Albert Gjedde is (co-)author of a long list of highly cited publications like his work on the Gjedde-Patlak plot, also known as the Multitime Graphical Analysis, which linearized irreversible brain uptake of tracers. During his career, he has received multiple academic distinctions for his pioneering work as neuroscientist.
