SECTION IV : FIRE AND EXPLOSION HAZARD DATA

FLASH POINT	n/a
EXTINGUISHING MEDIA	Water spray, dry chemical, carbon dioxide or foam as appropriate for surrounding fire and materials.
SPECIAL FIRE FIGHTING PROCEDURES	As with all fires, evacuate personnel to safe area. Fire fighters should use self-contained breathing equipment and protective clothing.
UNUSUAL FIRE AND EXPLOSION HAZARDS	This material is assumed to be combustible. As with all dry powders it is advisable to ground mechanical equipment in contact with dry material to dissipate the potential build-up of static electricity. When heated to decomposition material emits toxic fumes. Emits toxic fumes under fire conditions.
FLAMMABLE LIMITS	LOWER n/a UPPER n/a
STABILITY	() Unstable (x) Stable
CONDITIONS TO AVOID	Material is stable from a safety point of view. Strong oxidizers, alcohols, acids, caustic alkalis, heavy metal ions, and tannin.
HAZARDOUS DECOMPOSITION PRODUCTS	When heated to decomposition material emits toxic fumes. Emits toxic fumes under fire conditions.
HAZARDOUS POLYMERIZATION	() May Occur (x) Will Not Occur

SECTION V : HEALTH HAZARD DATA

TRESHOLD LIMIT VALUE	None established
EFFECTS OF OVEREXPOSURE	LD ₅₀ (oral, mouse) > 21.500 mg/kg The usual oral adult dose is 325 mg to 1 g, taken before or with meal. High doses may cause nausea and diarrhea; the administration of pancreatin may also cause hyperuremia. Possible allergic reaction to dust if inhaled, ingested or in contact with skin. Can cause allergic skin reaction, and allergic respiratory reaction. Repeated breathing of dust could cause allergic rhinitis and/or bronchial asthma.
ACUTE	Eye, skin and/or respiratory tract irritation
CHRONIC	Possible hyper sensitization, dermatitis

PRECAUTIONS TO CONSIDER

Persons developing hypersensitivity (anaphylactic) reactions must receive immediate medical attention. Avoid prolonged or repeated contact with skin. Material may be irritating to mucous membranes and respiratory tract. As a general rule, when handling FIP Reference Standards avoid all contact and inhalation of dust, fumes, mist, and/or vapours associated with the material. Keep container tightly closed and use with adequate ventilation; wash thoroughly after handling. Individuals working with chemicals should consider all chemicals to be potentially hazardous even if their individual hazards may be uncharacterized or unknown.

FIRST AID PROCEDURES

Remove from exposure. Remove contaminated clothing. Persons developing serious hypersensitivity reactions must receive immediate medical attention. Upon eye or skin contact, flush affected area with copious quantities of water. Use general supportive measures. Obtain medical attention. If not breathing give artificial respiration. If breathing is difficult give oxygen.

1. **INHALATION**

May cause irritation of respiratory tract. Avoid inhalation. Remove to fresh air.

2. **EYES**

May cause irritation. Flush with copious quantities of water.

3. **SKIN**

May cause irritation. Flush with copious quantities of water.

4. **INGESTION**

May cause irritation. Flush out mouth with water.
