## ROKEN: EEN WERELDWIJD FENOMEEN

| WHO Region            | Male prevalence | Female prevalence | Both sexes |
|-----------------------|-----------------|-------------------|------------|
| Europe                | 38%             | 19%               | 28%        |
| Western Pacific       | 48%             | 3%                | 26%        |
| Eastern Mediterranean | 37%             | 3%                | 20%        |
| America               | 22%             | 13%               | 17%        |
| South-East Asia       | 32%             | 2%                | 17%        |
| Africa                | 25%             | 2%                | 13%        |
| Global                | 36%             | 7%                | 21%        |

In 2015 waren er wereldwijd **933,1 miljoen** dagelijkse rokers.

WHO, 2015

## DRUGS PEOPLE GET HOOKED ON

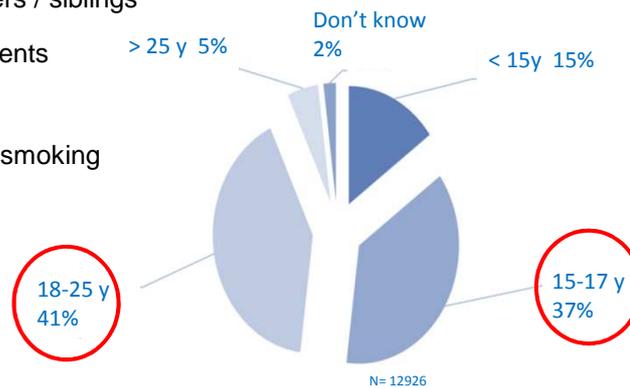

SOURCES: Institute of Medicine, 1999; US Department of Health, 2013; New York Times, 2014

BUSINESS INSIDER

## SMOKING COMMONLY STARTS AT A YOUNG AGE

Factors associated with youth tobacco use include:

- Low socioeconomic status
- Smoking by peers / siblings
- Smoking by parents or guardians
- Perception that smoking is the norm

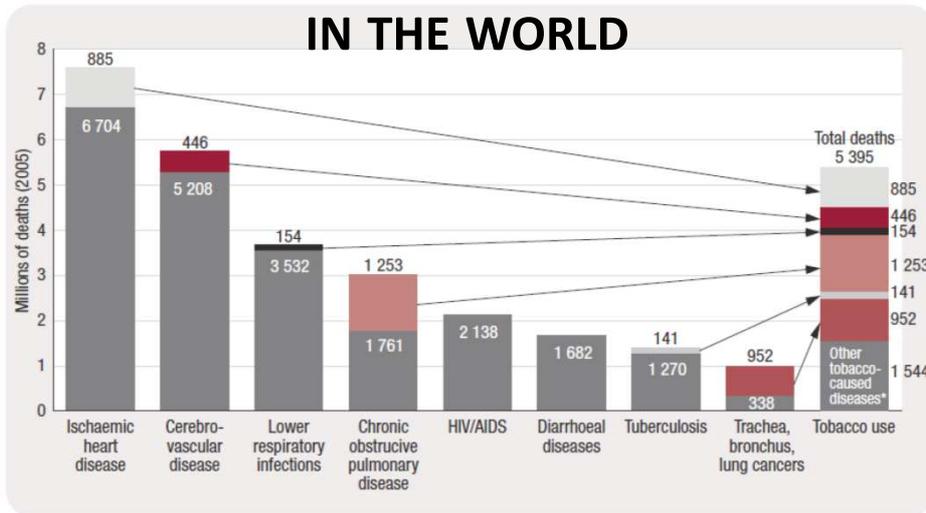

European Commission, Special Eurobarometer 458, 2017

## ROKERS IN BELGIË

- **20% rookt** (25% : EU /wereld)
- **17% rookt dagelijks** (25% wereld)
- **25% rookt bij 25-34j en 8% bij 15-17j**
- Dagelijks gemiddeld **17 sigaretten/dag.** (14 sig/d EU)
- **Mannen roken meer** dan vrouwen (B: 24% vs 15%; EU: 30% vs 22% en wereldwijd: 25% vs 5% )
- **66%** van de rokers rookt **gewone sigaretten** en 29% van hen rookt roltabak.

## PSYCHOLOGISCHE BENADERING

- **MOTIVATIONELE GESPREKSVOERING**
- **GEDRAGSTHERAPIE (EN COGNITIEVE GEDRAGSTHERAPIE)**

Gesprekstechnieken om individuen te motiveren tot gedragsverandering.

  - "the stages of change" en motivationeel interviewen.

Open vragen stellen, reflectief en empathisch luisteren, bevestigen, samenvatten, verandertaal uitlokken

Nieuw gedrag aanleren

  - Bewust worden van het probleem
  - Aanvoelen wanneer moeilijk
  - Leren omgaan met moeilijke momenten

Social Work Podcast #53  
Prochaska & DiClemente's Stages of Change Model

Australian Smoking Cessation Guidelines, 2016

## EFFECT VAN PSYCHOLOGISCHE BENADERING

| Level of contact                            | Number of arms | Estimated odds ratio (95% C.I.) | Estimated abstinence rate (95% C.I.) |
|---|----------------|---------------------------------|--------------------------------------|
| No contact                                  | 30             | 1.0                             | 10.9                                 |
| Minimal counselling (< 3 minutes)           | 19             | 1.3 (1.01, 1.6)                 | 13.4 (10.9, 16.1)                    |
| Low intensity counselling (3-10 minutes)    | 16             | 1.6 (1.2, 2.0)                  | 16.0 (12.8, 19.2)                    |
| Higher intensity counselling (> 10 minutes) | 55             | 2.3 (2.0, 2.7)                  | 22.1 (19.4, 24.7)                    |

  

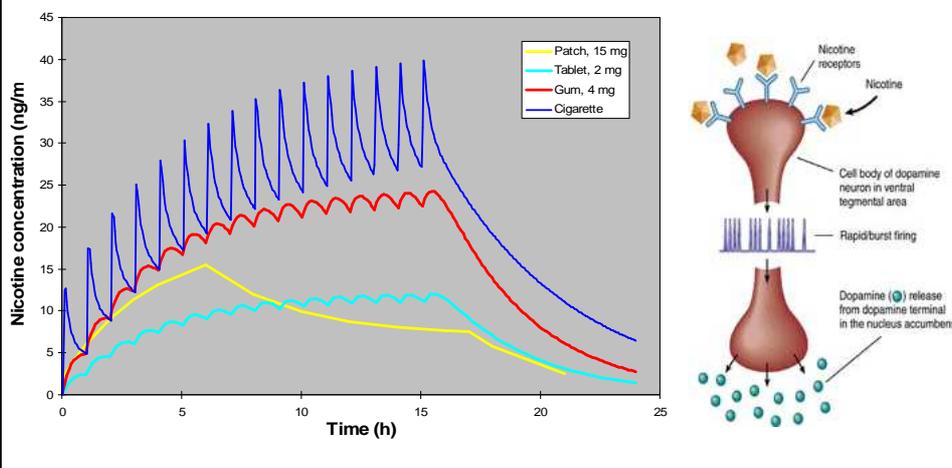

| Number of sessions | Number of arms | Estimated odds ratio (95% C.I.) | Estimated abstinence rate (95% C.I.) |
|--------------------|----------------|---------------------------------|--------------------------------------|
| 0-1 session        | 43             | 1.0                             | 12.4                                 |
| 2-3 sessions       | 17             | 1.4 (1.1, 1.7)                  | 16.3 (13.7, 19.0)                    |
| 4-8 sessions       | 23             | 1.9 (1.6, 2.2)                  | 20.9 (18.1, 23.6)                    |
| > 8 sessions       | 51             | 2.3 (2.1, 3.0)                  | 24.7 (21.0, 28.4)                    |

Fiore MC, Bailey WC, Cohen SJ, et al. Clinical Practice Guideline: Treating Tobacco Use and Dependence - 2008 Update. Rockville, MD: U.S. Department of Health and Human Services, Public Health Service; 2008.

Fiore MC et al, Clinical Practice Guideline, Treating use and dependence, 2008

## NICOTINE REPLACEMENT THERAPY

# VARENICLINE

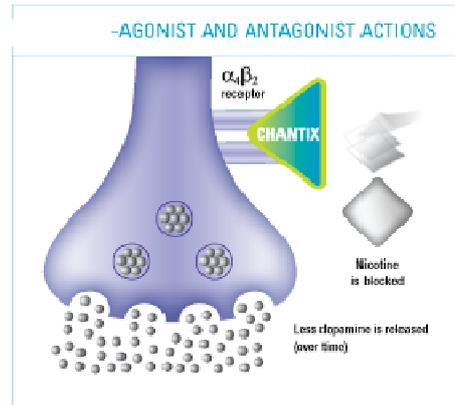

Varenicline is a high-affinity  $\alpha 4\beta 2$  nicotinic acetylcholine receptor (nAChR)

**Stimulating dopamine release through its agonist property**

→ reduce craving and withdrawal symptoms

**Blocking nicotine binding through varenicline's antagonist property**

→ reduce the reinforcing effects of smoking

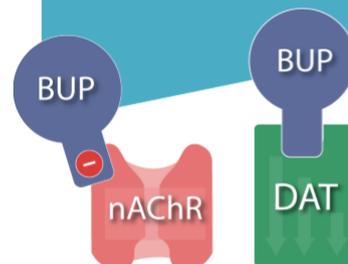

# BUPROPION

- Een zwakke selectieve inhibitor van de heropname van noradrenaline en dopamine. Tevens minimaal effect op heropname serotonine.
- Niet-competitieve inhibitor van de  $\alpha 4\beta 2$  en  $\alpha 3\beta 2$

Mechanism unclear, might involve:

- Antagonism of nAChR
- Dopaminergic effect on reward mechanisms

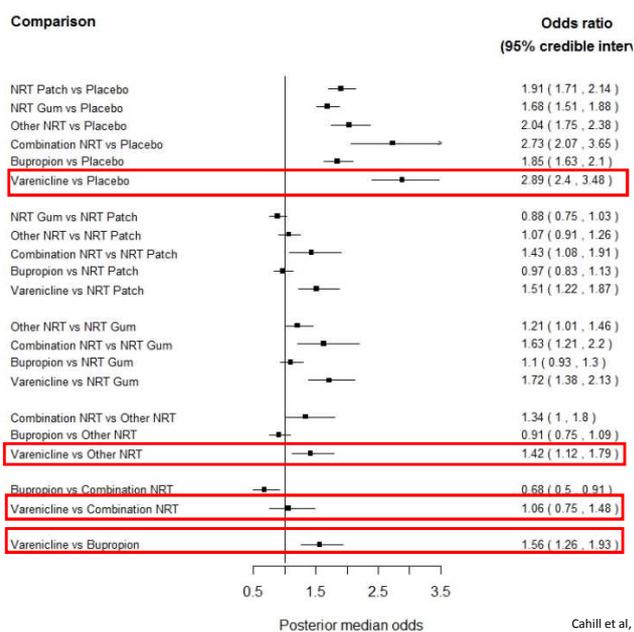

Quaack et al 2009 ERJ

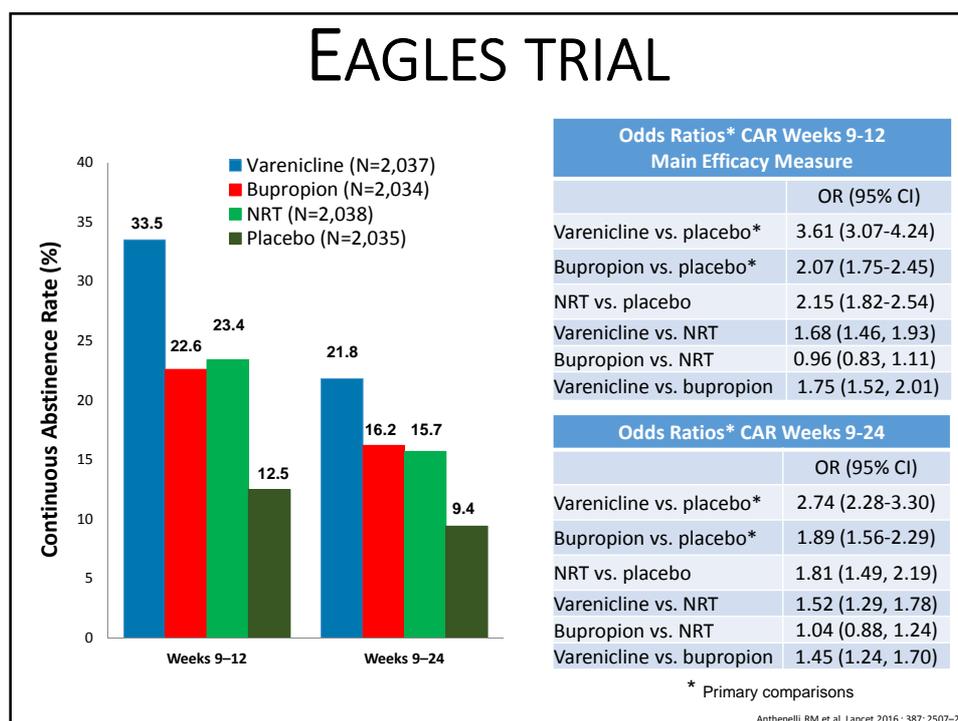

## SMOKING CESSATION: PHARMACOTHERAPY VS. PLACEBO AT 6 MONTHS

|                              | OR (95% CI)     | Estimated Abstinence Rate (95% CI) |
|------------------------------|-----------------|------------------------------------|
| <b>Placebo</b>               | 1,0             |                                    |

## EFFECTS MEDICATION AND BEHAVIOUR SUPPORT

## WAT IS EEN TABAKOLOOG?

Een tabakoloog is een dokter (huisarts of specialist), een andere professionele gezondheidswerker (verpleegkundige, kinesist, vroedvrouw enz.) of een psycholoog die een aanvullende interuniversitaire opleiding tabakologie heeft gevolgd.

## WAT DOET EEN TABAKOLOOG?

- Rookprofiel
- Beoordeling van verslaving op lichamelijk, psychologisch en op gedragsmatig vlak.
- Meten en evalueren van rookstatus
- Beoordeling van motivatie en zelfvertrouwen
- Bespreking van de rookstophulpmiddelen
- Strategie opstellen om te stoppen
- Motivationale gesprekstechnieken
- Cognitieve en gedragstherapie
- Coaching
- Herval en valkuilen bespreken
- Follow up

## DAMPEN-VAPEN: E-SIGARET

1. Incidentie
2. Evolutie
3. Effect als rookstophulpmiddel

# BELGIË

14% ooit een e-sig gebruikt (2015: 10%)(EU: 15%)

17% bij de 18-34 j (EU: 21%)

34% om te stoppen; 25% om minder te roken (EU: 61%)

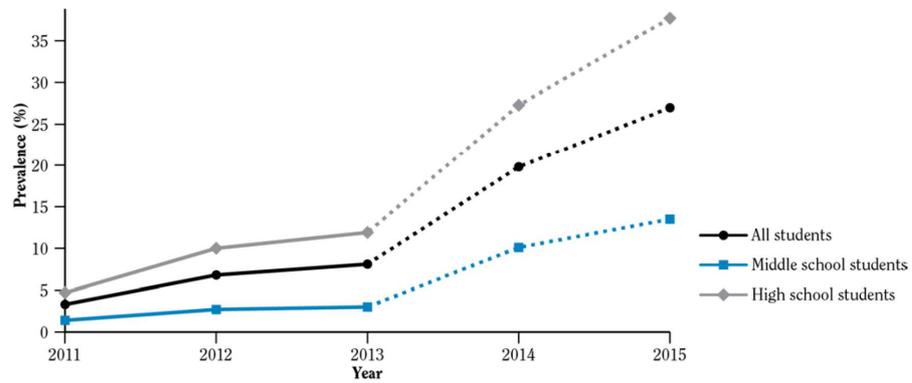

3% dagelijks (EU: 2%)

60% dual users en vnl gebruik van e-sig met nicotine (EU: 86%)

European Commission, Special Eurobarometer 458, 2017  
Stichting tegen kanker, 2017

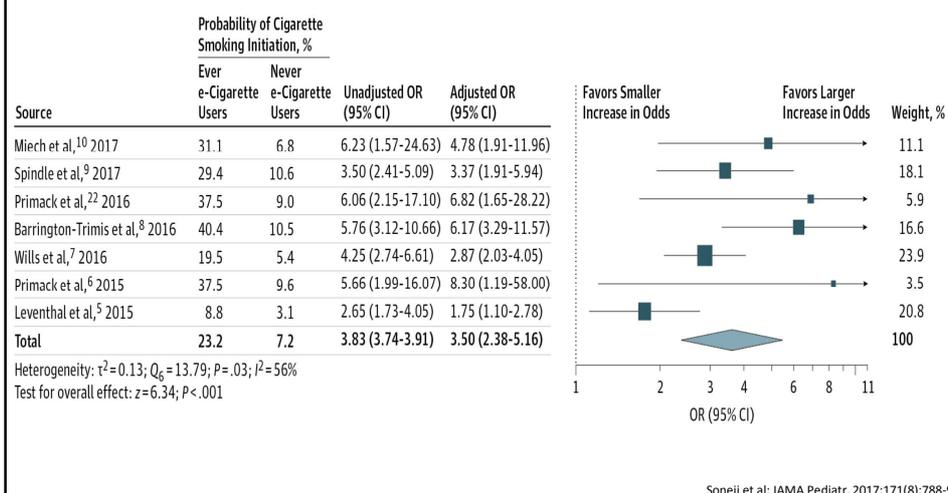

# TRENDS IN EVER E-CIGARETTE USE AMONG US STUDENTS

Gateway drug ???

Report of the Surgeon General, 2016

## ASSOCIATION BETWEEN INITIAL USE OF E-CIGARETTES AND SUBSEQUENT CIGARETTE SMOKING AMONG ADOLESCENTS AND YOUNG ADULTS

## E-CIGARETTE

Battery-powered heating a solution (vapor) typically made up of propylene glycol or glycerin, nicotine and flavoring agents.

1st Generation  
"Cig-a-like"

2nd Generation  
"Vape-pen"

3rd Generation  
"Box mod"

4th Generation  
"Temperature Control (TC)  
Box mod"

Clapp et al, Curr Allergy Asthma Rep. 2017; 17:79

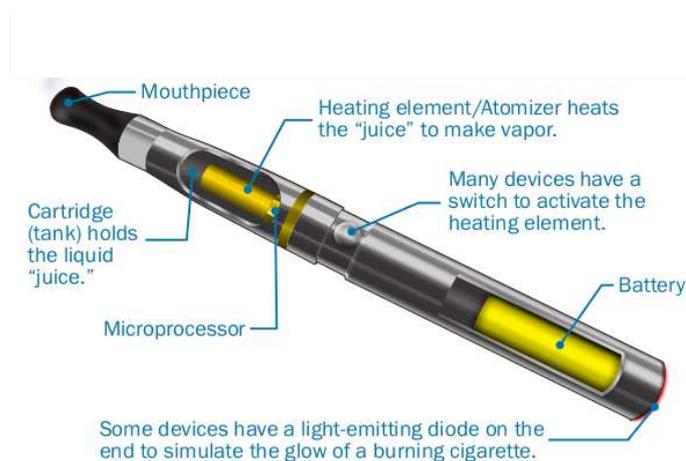

## E-LIQUID

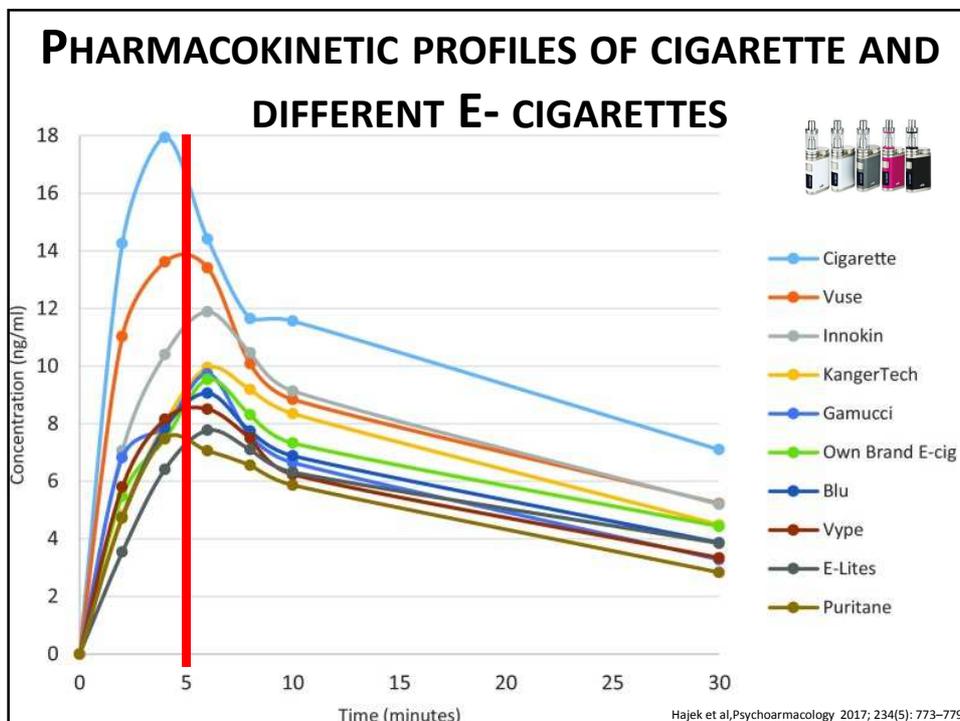

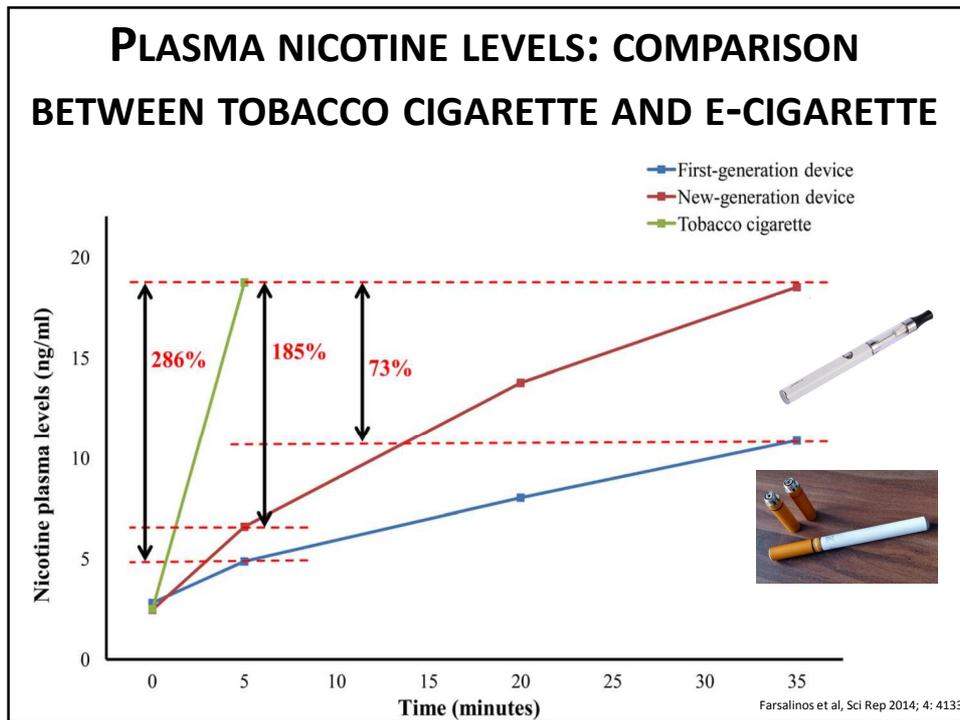

- E-vloeistof, E-liquid en soms ook E-juice genoemd
- Bevat water, aroma's, propyleenglycol (PG) en/of plantaardige glycerine (VG) en meestal nicotine
- Sensoriele stimulatie via e-sig: throat hit of zoete smaak
- Aroma's of smaakstoffen zijn veilig indien gebruik in voeding
- Verschillende nicotinegehaltenes: 0 - 36 mg

## MECHANISM

# JUUL

Podmod → “I-phone van de e-sigaretten”

Vooral jongeren doen aan JUULING: 12% van 17% in VS

JUULpod: reservoir van 0,7 ml nicotine vloeistof → 200 puffs

Nicotine salts= JUULsalts

op basis van benzoëzuur en nicotinezouten  
afkomstig uit tabaksblad

5% nicotine = 59 mg/ml = nic conc van 20 sig.

Nicotine wordt sneller en met hogere concentratie opgenomen dan  
tov een traditione e-cig en is zachter om te inhaleren

Starterspakket 50 € : JUUL, oplader en 4 pods, 16 € voor 4 pods

# IQOS

- Nieuwe elektronische sigaret van Philip Morris
- Heat not to burn
- Een hybride tussen een E-sigaret en een conventionele sigaret
- “Cold smoke” met 350°C → getoomde tabaksdamp inademen
- Evenveel en evensnel nicotine opname
- 6 min gebruik → 14 a 16 puffs
- 70 € en 6 € per 20 heet sticks

Tabuchi et al, 2017, Tob. Control, 0; 1-9 Xiaoqiu Liu, et al, 2018; J Epidemiol

## EXPLOSION INJURIES FROM E-CIGARETTES

Brownson et al, N Engl J Med 375;14 nejm.org October 6, 2016

## E-SIG KUNNEN VERSCHILLEND ZIJN OP:

- Atomizer: prebuilt, RTA, RDA
- Weerstand: variëren ts 1,2 en 3 Ohm of <1,0 Ohm als standard, dual, quad coil
- Gloeidraadmateriaal: kanthal, nikkel, titanium, roestvrij staal, koper, zilver, zink en tin
- Lont: Silica, Katoen, bamboe
- Verschillende e liquids : smaakstoffen en met Nicotine (conc) /zonder
- Verhouding PG/VG
- Voltage/Wattage/ T°
- MTL/DL

Chun et al, Am L Physiol Lung Cell MolPhysiol, 2017; 313:L193-206

## EFFECTS OF E-CIGARETTE FOR SMOKING CESSATION

### ECLAT trial

Caponnetto P<sup>1</sup>, Campagna D, Cibella F, Morjaria JB, Caruso M, Russo C, Polosa R. **EffiCienCy and Safety of an eLectronic cigAreTte (ECLAT) as tobacco cigarettes substitute: a prospective 12-month randomized control design study.** PLoS One. 2013 Jun 24;8(6): e66317

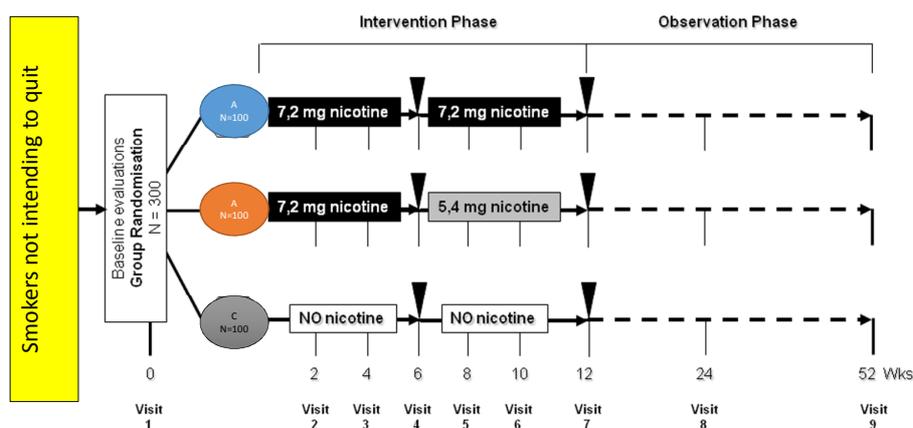

### ASCEND trial

Bullen C, Howe C, Laugesen M, McRobbie H, Parag V, Williman J, Walker N. **Electronic cigarettes for smoking cessation: a randomised controlled trial.** Lancet. 2013

### EffiCienCy and Safety of an eLectronic cigAreTte (ECLAT) as Tobacco Cigarettes Substitute: A Prospective 12-Month Randomized Control Design Study

## E-CIGARETTES FOR SMOKING CESSATION

## E-CIGARETTES FOR SMOKING REDUCTION

Boyle et al, Cochrane Database of Systematic Reviews, 2014

American Journal of  
**Preventive Medicine**

---

**RESEARCH ARTICLE**

**E-cigarettes Associated With Depressed Smoking  
Cessation: A Cross-sectional Study of 28 European  
Union Countries**

Margarete C. Kulik, PhD, Nadra E. Lisha, PhD, Stanton A. Glantz, PhD

**Conclusions:** These results suggest that e-cigarettes are associated with inhibiting rather than assisting in smoking cessation. On the population level, the net effect of the entry of e-cigarettes into the European Union (and Great Britain) is associated with depressed smoking cessation of conventional cigarettes.

Kulik et al, Am J Prev Med , 2018; 54,4, 603-9

## TAKE HOME MESSAGES (1)

- GPs have an important role in the identification and evaluation of the smoking status and in giving a brief smoking cessation advice.
- The combination of intensive counseling and smoking cessation pharmacotherapy gives the highest smoking cessation quit rate
- Combination NRTs are even efficient as Varenicline.

## TAKE HOME MESSAGES (2)

- E-cigarette use increases risk of ever using combustible tobacco cigarettes among youth and young adults.
- E-cigarette use is not safe!
- The efficacy of E-cigarette as smoking-cessation tool is graded LOW.
- Usage of e-cigarette may discourage smokers from quitting.

## TAKE HOME MESSAGES (3)

Send patient to smoking cessation consultant

### ASK Do you use tobacco products?

*Include use of e-cigs in assessment*

### ADVISE to quit.

*For those currently using e-cigs, evaluate patterns and duration of use, potential AE, and understanding of risks vs. benefits.*

### ASSESS willingness to quit.

*Explore willingness to use alternative cessation aids (e.g. NRT, bupropion, varenicline)*

### ASSIST in quit attempt.

*Switch to FDA-approved cessation aids if willing. If continued use of e-cigs, explain risks vs. benefits.*

### ARRANGE for follow-up.

*Establish quit date. Monitor patterns of use, AE, continued use of traditional tobacco products. Ensure use of e-cigs for shortest duration possible.*

Franks et al. 2018, Pharmacotherapy;38(5):555-568; Fiore et al. JAMA 2008;299:2083-5
