7. LINGUISTIC CLASS CODES

There are, however, seven words that the English uppers and upper-middles regard as infallible shibboleths. Utter any one of these 'seven deadly sins' in the presence of these higher classes, and their on-board class-radar devices will start bleeping and flashing: you will immediately be demoted to middle-middle class, at best, probably lower – and in some cases automatically classified as working class.

Pardon

This word is the most notorious pet hate of the upper and upper-middle classes. Jilly Cooper recalls overhearing her son telling a friend ‘Mummy says that “pardon” is a much worse word than “fuck”’. He was quite right: to the uppers and upper-middles, using such an unmistakably lower-class term is worse than swearing. Some even refer to lower-middle-class suburbs as ‘Pardonia’. Here is a good class-test you can try: when talking to an English person, deliberately say something too quietly for them to hear you properly. A lower-middle or middle-middle person will say ‘Pardon?’; an upper-middle will say ‘Sorry?’ (or perhaps ‘Sorry – what?’ or ‘What – sorry?’); but an upper-class and a working-class person will both just say ‘What?’ The working-class person may drop the ‘t’ – ‘Wha?’ – but this will be the only difference. Some upper-working-class people with middle-class aspirations might say ‘pardon’, in a misguided attempt to sound ‘posh’.

Toilet

‘Toilet’ is another word that makes the higher classes flinch – or exchange knowing looks, if it is uttered by a would-be social climber. The correct upper-middle/upper term is ‘loo’ or ‘lavatory’ (pronounced lavuhtry, with the accent on the first syllable). ‘Bog’ is occasionally acceptable, but only if it is said in an obviously ironic-jocular manner, as though in quotes. The working classes all say ‘toilet’, as do most lower-middles and middle-middles, the only difference being the working-class omission of the final ‘t’. (The working classes may also sometimes say ‘bog’, but without the ironic quotation marks.) Those lower- and middle-middles with pretensions and aspirations, however, may eschew ‘toilet’ in favour of suburban-genteel euphemisms such as ‘gents’, ‘ladies’, ‘bathroom’, ‘powder room’, ‘facilities’ and ‘convenience’; or jokey euphemisms such as ‘latrines’, ‘heads’, ‘privy’ (females tend to use the former, males the latter).

Dinner

There is nothing wrong with the word ‘dinner’ in itself: it is only a working-class hallmark if you use it to refer to the midday meal, which should be called ‘lunch’. Calling your evening meal ‘tea’ is also a working-class indicator: the higher echelons call this meal ‘dinner’ or ‘supper’. (Technically, a dinner is a somewhat grander meal than a supper: if you are invited to ‘supper’, this is likely to be an informal family meal, eaten in the kitchen – sometimes this is made explicit, as in ‘family supper’ or ‘kitchen supper’. The uppers and upper-middles use the term ‘supper’ more than the middle- and lower-middles). ‘Tea’, for the higher classes, is taken at around four o’clock, and consists of tea and cakes or scones (which they pronounce with a short ‘o’), and perhaps little sandwiches (pronounced ‘sanwidges’, not ‘sand-witches’). The lower classes call this ‘afternoon tea’. All this can pose a few problems for foreign visitors: if you are invited to ‘dinner’, should you turn up at midday or in the evening? Does ‘come for tea’ mean four o’clock or seven o’clock? To be safe, you will have to ask what time you are expected. The answer will help you to place your hosts on the social scale.

Sweet

Like ‘dinner’, this word is not in itself a class indicator, but it becomes one when misapplied. The upper-middle and upper classes insist that the sweet course at the end of a meal is called ‘pudding’ – never the ‘sweet’, or ‘afters’, or ‘dessert’, all of which are déclassé, unacceptable words. ‘Sweet’ can be used freely as an adjective, but as a noun it is piece of confectionary [sic] – what the Americans call ‘candy’ – and nothing else. The course at the end of the meal is always ‘pudding’, whatever it consists of: a slice of cake is ‘pudding’, so is a lemon sorbet. Asking: ‘Does anyone want a sweet?’ at the end of a meal will get you immediately classified as middle-middle or below. ‘Afters’ will also activate the class-radar and get you demoted. Some American-influenced young upper-middles are starting to say ‘dessert’, and this is therefore the least offensive of the three – and the least reliable as a class indicator. It can also cause confusion as, to the upper classes, ‘dessert’ traditionally means a selection of fresh fruit, served right at the end of a dinner, after the pudding, and eaten with a knife and fork.

10. FALSE FRIENDS

A **false friend** is a word in a foreign language that looks or sounds similar to a word in your own language, but does not have exactly the same meaning. There are two reasons why English has so many false friends for speakers of other languages:

- * English words often have the same origins as similar words in other languages, but sometimes different meanings of the words have developed in the different languages. For example, *sensible* looks like *sensible* (French, Spanish) and *sensibel* (German, Danish, Norwegian, Swedish), but does not mean the same: these words mean the same as the English *sensitive*.
- * English words have been borrowed by other languages, and sometimes these have been given new or different meanings.

It's too late to save her now. • Buy now before it's too late.

P)

presently / / *'prezntlɪ; NAmE* / adverb

- 1 (especially [NAmE](#)) at the time you are speaking or writing; now

SYN [CURRENTLY](#):

The crime is presently being investigated by the police. • These are the courses presently available.

► HELP NOTE

In this meaning **presently** usually comes before the verb, adjective or noun that it refers to.

- 2 used to show that sth happened after a short time:

Presently, the door opened again and three men stepped out.

► HELP NOTE

In this meaning **presently** usually comes at the beginning of a sentence.

- 3 used to show that sth will happen soon

SYN [SHORTLY](#):

She'll be here presently.

► HELP NOTE

In this meaning **presently** usually comes at the end of a sentence.

► BRITISH / AMERICAN

presently

In both *BrE* and *NAmE*, **presently** can mean 'soon' or 'after a short time': *I'll be with you presently*. In *NAmE* the usual meaning of **presently** is 'at the present time' or 'now': *She is presently living in Milan. • There is presently no cure for the disease*. This use is becoming more accepted in *BrE*, but **at present** or **currently** are usually used.

Q)

► WHICH WORD

quite / fairly / rather / pretty

Look at these examples:

The exam was fairly difficult.

The exam was quite difficult.

The exam was rather difficult.

Quite is a little stronger than **fairly** and **rather** is a little stronger than **quite**. **Rather** is not very common in *NAmE*; **pretty** has the same meaning and this is used in informal *BrE* too: *The exam was pretty difficult.*

In *BrE* **quite** has two meanings: *I feel quite tired today* (=fairly tired). With adjectives that describe an extreme state ('non-gradable' adjectives) it means 'completely' or 'absolutely': *I feel quite exhausted*. With some adjectives, both meanings are possible. The speaker's stress and intonation will show you which is meant: *Your essay is 'quite good* (= fairly good – it could be better); *Your essay is quite 'good* (= very good, especially when this is unexpected).

In *NAmE* **quite** usually means something like 'very', not 'fairly' or 'rather'. **Pretty** is used instead for this sense.

Usage note ▲

In British English, using **quite** suggests you are not very enthusiastic about something. In American English, **quite** is a stronger way of qualifying an adjective. In both British and American English, the way you say the word is important. In British English, if you say *It was quite good* and you put the emphasis on the **quite**, you mean it was good, but not very good. If you put the emphasis on **good**, you mean it was very good. In British English, when it is used with adjectives like *impossible* or *unacceptable*, it means **completely**, and you put the emphasis on it. In American English, the emphasis is always on the adjective that goes with **quite**.

WORD CHOICE: ▲

rather, fairly, quite, pretty

Rather, fairly, quite, and pretty are all used to say that something is true to some degree, but not completely or extremely

- *She's rather shy.*
- *You should find the test fairly easy.*
- *It took quite a long time (NOT a quite long time).*
- *His English is pretty good.*

Rather is fairly formal but can be used in spoken English, especially British English. In American English it is more usual to use **pretty**. In both American and British English, **pretty** is more usual in speech than in writing.

Quite can also be used in front of an adjective or adverb, and in British English a verb, to mean 'completely'. This is a fairly formal use

- *You are quite wrong.*
- *I quite understand your feelings.*

regard to think of sb/sth in a particular way: *He seemed to regard the whole thing as a joke.*

consider to think of sb/sth in a particular way: *Who do you consider (to be) responsible for the accident?*

regard or consider?

These two words have the same meaning, but they are used in different patterns and structures. You can also *consider that sb/sth is sth* and again, the *that* can be left out. **Regard** is used in a narrower range of structures. The most frequent structure is *regard sb/sth as sth*; the *as* cannot be left out: *I regard him a close friend.* You cannot : *regard sb/sth to be sth* or : *regard that sb/sth is sth*. However, **regard** (but not **consider** in this meaning) can also be used without a noun or adjective complement but with just an object and adverb (*sb/sth is highly regarded*) or adverbial phrase (*regard sb/sth with suspicion / jealousy / admiration*).

see to have an opinion of sth: *Try to see things from her point of view.*

view to think of sb/sth in a particular way: *How do you view your position within the company?*

say / tell

Say never has a person as the object. You **say something** or **say something to somebody**. **Say** is often used when you are giving somebody's exact words: 'Sit down', she said. Anne said, 'I'm tired.' Anne said (that) she was tired. What did he say to you? You cannot use 'say about', but **say something about** is correct: I want to say something /a few words /a little about my family. **Say** can also be used with a clause when the person you are talking to is not mentioned: She didn't say what she intended to do.

Tell usually has a person as the object and often has two objects: Have you told him the news yet? It is often used with 'that' clauses: Anne told me (that) she was tired. **Tell** is usually used when somebody is giving facts or information, often with *what, where, etc.*: Can you tell me when the movie starts? (BUT: Can you give me some information about the school?) **Tell** is also used when you are giving somebody instructions: The doctor told me to stay in bed. The doctor told me (that) I had to stay in bed. OR The doctor said (that) I had to stay in bed. NOT The doctor said me to stay in bed.
