WHY SOCIOLOGY AT GHENT UNIVERSITY?
Do you want to understand how society works, and are you motivated to strengthen your research skills, gain international experience and develop intercultural expertise? If you have answered yes to these questions, this program is exactly what you are looking for!

The Master of Science in Sociology is a new and innovative English-taught program at Ghent University, centred around three pillars: applied research, internationalisation and an advanced scientific approach to contemporary societal problems.

What are the social conditions that constitute the fundamental causes of health and illness? How can higher education institutions become more accessible? Why have so many young Muslims joined Islamic State the past couple of years? How are power and responsibilities formally and informally distributed within organisations? This program addresses these and other contemporary social problems. Students gain a strong scientific approach that allows them to critically address such topics.

This one-year master program is highly research based. Students gain a thorough understanding of advanced quantitative research methods, and are challenged to apply these skills to answer sociological questions. Students write a master thesis and opt for an international internship or follow advanced policy-oriented applied courses.

BOOST YOUR SOCIOLOGICAL IMAGINATION THROUGH AN INTERNATIONAL INTERNSHIP
Sociological imagination is the ability to connect the things that happen to people (such as their success in education, their relationship with their parents and their well-being) to social characteristics (the way schools are organized, the divorce rate, the degree of social inequality). To have this sociological imagination, a person must pull away from the situation and think from an alternative point of view. No better way to sharpen your sociological imagination by taking up an internship! Within the Major Internship, students are challenged to use their sociological imagination in real life contexts and take their expertise to the next level. Internships within our program take place in an international organisation, a civil society organization, a non-profit organisation, a governmental organisation or a business. During this experience, students confront theoretical learning with hands-on experience, characterized by social engagement. By partaking in daily operations students gain invaluable practical experience while critical thinking and problem-solving abilities are stimulated and personal, professional and socially relevant skills are developed.

SHARPEN YOUR EXPERTISE THROUGH ADVANCED COURSES ON POLICY AND MANAGEMENT
Students who choose the Major Policy and Management immerse themselves in courses on human resources management, public administration, governance, change management and international development. This major allows an individually tailored study program based on personal interests and possible future career paths. Examples of course clusters are: human resource management, EU international development policy or human rights in developing countries.

DARE TO EXPLORE YOUR TALENTS IN THE SKILLS LAB
In the Major Skills Lab, students explore and develop applied skills to prepare for future careers through courses such as ‘Dare to Venture’, ‘Business Skills’ and ‘advanced Academic English’.
If direct enrolment in the Master of Sociology is not possible, you might be admitted to the Preparatory Course Master in Sociology. This programme is only taught in Dutch and can be found at studiegids.ugent.be ('schakel- of voorbereidingsprogramma').

GENERAL COURSES
The program departs from a core set of mandatory advanced sociological courses on health sociology, migration, education, policy and organisation and quantitative analysis, that will unravel the secrets of multilevel analysis.

SOCIOLOGY OF HEALTH AND ILLNESS
This educational component imparts insight into the social conditions that constitute the social causes of health and illness; knowledge of the main explanations of the relation between social organization and health or illness; knowledge of some aspects of the formal and informal institutionalized health care services. Students are introduced to a number of important concepts, theories and findings from the sociology of health and illness. Light is shed on the specificity of the sociological perspective. We study social processes as fundamental causes of health and illness and pay special attention to the sociology of mental health and subjective well-being. The sociology of health and illness and medical sociology, the pan-historical and cross-cultural spread of health and illness, social class, social inequality and health, gender and health and illness, end-of-life, the sociology of mental health, the social stress model, stigma and discrimination, medicalization and healthism, alternative and complementary medicine, migration and mental health are addressed.

MIGRATION AND INTEGRATION
This course starts with an introductory overview of the history, determinants and types of migration, from an international perspective. In the next section, we discuss the classic theories of integration (e.g. assimilation theory, segmented assimilation theory, ethnic enclave theory and ethnic boundaries theory). The following questions are central to this section: What are the possible outcomes of integration in a society? To which extent are these outcomes dependent on the type of migration and the sociological context of the society? Afterwards, we apply these questions to several topics, such as: marriage patterns of ethnic minorities, ethnic residential segregation, socio-economic positions of ethnic minorities, interethnic relations and discrimination, religious practices, social cohesion in a super-diverse society. At the end, we consider the different strategies policy makers can follow to deal with migration and integration. This course offers an overview of all relevant theories of migration and integration, and stimulates the application onto current-day topics. We use the following methods: interactive exercises, discussions in small groups, student debates and flipped-classroom methods.

HIGHER EDUCATION
This unit introduces the students to key themes and challenges in contemporary higher education and higher education research. Different themes will be

The Master of Science in Sociology focusses on three main parts: 1. a solid, general formation in advanced sociological topics (general courses), 2. an applied major in which practical skills are developed (Internship, Policy and Management and Skills Lab) and 3. a research based master dissertation.
The first semester of the programme is fully dedicated to the core mandatory advanced sociological courses. From the start students begin preparing for their master dissertation or internship. This program is a one-year programme with a high pace but is feasible thanks to the gradual planning. By the end of the first semester, students should have taken all exams and can fully concentrate on their major and master dissertation. At the end of the second semester the course Social Dynamics of Policy and Organization helps to digest the experiences developed during the thesis research, the internship and the other courses.
MAJORS

Students can choose between three majors: International Internship, Policy and Management or Skills Lab. Students design their own trajectory based on their personal interest, future career prospects and ambitions.

OPTION 1: INTERNATIONAL INTERNSHIP

The global volunteer program of AIESEC provides students with the opportunity to develop and experience a shared responsibility for the world and equip them with the tools to shape a better future. Through an AIESEC internship, students become part of an international pool of future talent. Projects generally deal with sustainable development goals. If you want to volunteer with elders for reduced inequality in Portugal, promote children’s empowerment through education in Brazil, conserve biodiversity in Sri Lanka or teach orphans in Nigeria, this is your major. The internship takes about 6 weeks. The costs are about 265 euro. This includes accommodation, one meal a day and guidance. Transportation is excluded.

All information to be found on: www.aiesec.org

OPTION 2: POLICY AND MANAGEMENT

Course specific to this major:

• Operational Human Resource Management
In operational HRM we want to provide students with an experiential approach to the study of HRM while focusing on the enhancement of student competencies in applying High Performance Work Practices. This course is offered in the second semester and builds further on the competencies in the course ‘Human Resource Management in Public Organizations’.

OPTION 3: SKILLS LAB

Courses specific to this major:

• Dare to Venture
The student learns to collect feedback on a business idea and to structure this feedback into a first draft of a business model. The student team starts from a business idea that will be confronted with the environment, e.g. distributors, potential customer groups and users, suppliers, designers, producers or regulators.

• Business Skills
This course emphasizes critical management skills that yield sound organizational results. Based on theory and empirical evidence, the course treats leadership competencies that are essential for employee engagement, effective communication, and sustainable organizational success. This is a crucial demand in the turbulent environments of organizations nowadays, but it requires leaders to leave their comfort zones and to expand their mental models of effectiveness.

• Advanced Academic English
The overall objective of the course is to improve the students’ English language skills in an academic context. Focus is on writing and speaking skills. (academic writing, reporting, giving and attending a presentation, communicating with colleagues and with scholars from different fields of study).

A NUMBER OF OPTIONAL COURSES CAN BE CHOSEN IN BOTH MAJORS.

MANAGEMENT-ORIENTED COURSES

• Change Management
In this course, students develop insights in the broader processes of public sector reform, and the implications for public policy and management, as well as into theoretical paradigms in relation to change management, with a focus on public management.

• Human Resource Management in Public Organisations
Human Resource Management is viewed as a strategic and result-oriented approach of the workforce, based on a managerial logic of high performances. An integrative approach is used to make students familiar with theoretical and conceptual insights in Human Resource Management, based on a four-dimensional model of HRM. The focus lays on the implementation of Human Resource Management in public and social profit organizations.

• Comparative public administration and management
This course looks at the public administration, the organization of government, and the management of public organizations, in an internationally (European) comparative perspective. The focus is on the understanding and comparing of administrative structures and systems, and of reform processes in government at different levels (central and local government).

POLICY-ORIENTED COURSES

• Globalisation and Global Governance
This educational component examines ‘global governance’ or the political management of global problems. Ample attention will be paid to the historical context, the relation between politics and economics as a general background to the issues of global governance and related policy, as well as to the ideological component.

• The European Union’s International Development Policy
This specialised course addresses international and European development policies. The course conveys to students a profound knowledge of and a critical attitude towards development cooperation and the EU’s role and involvement as an international development actor.

• Human Rights in Developing Countries
This course provides a solid understanding of the history of human rights, the kinds of human rights, the sources of human rights, the general principles, the supervision of and the dynamics of human rights protection in international law at the universal and the regional levels, and, in a complementary way, also in domestic law of some developing countries, along with a solid understanding of and a critical view on a number of central human rights topics.

MASTER DISSERTATION

Making a master dissertation is performing your own quantitative or qualitative research, and writing it up in a scientific paper. The master dissertation is supervised by a Ghent University professor. It can be done in combination with your internship for instance through interviews of respondents during your stay abroad.

For all useful information, please consult the Master’s Dissertation regulations at the faculty website (psw.ugent.be).

DISSERTATION SEMINAR

The master’s dissertation seminar consists of small-group sessions in which students discuss methodological and other aspects of their ongoing research. Through these interactive, ‘hands on’ sessions, students enhance their research skills. The core consists of a number of interactive workshops. Each of them engages with a number of themes, such as formulating a research question in relation to contemporary scholarly consensus or debate, methods and methodology, operationalization, analysis and reporting and presenting data or findings.

Recent research among alumni shows that sociology graduates are highly appreciated by employers for their combination of thorough insights in society, research expertise, communication and project management skills. Sociology graduates from Ghent University start an academic career (as PhD students or research fellows) or work in NGO’s, governmental organisations (on themes such as health prevention, radicalisation) and research agencies (such as market research). Our alumni value the program for the acquired analytical skills and are very satisfied with their job content and wage.

The Ghent University master program in sociology offers insights in societal phenomena and learns how to study and research sociological problems. The program prepares you to begin to work on scientific projects in academia, governmental organisations or research institutes. Ghent University Masters in Sociology are ready to research social phenomena as social inequality, gender differences, quality of labour, democratisation of higher education, migration or health and risk behaviour. Our program helps students on their path towards future careers as policy advisors or project managers, in fields as diverse as human resources, journalism or education.

WHAT DO ALUMNI SAY?

“A versatile training program in which the development of a critical mind-set is key.”

“Strong, in-depth courses, taught by motivated professors with ample expertise in their field.”

“Good variety of seminars, practical teaching methods and theoretical lectures.”

“I appreciated the advanced statistical insights and the broad spectrum of topics like health, education, culture, citizenship and development.”
ENTRY REQUIREMENTS

You are eligible for this program if you hold a relevant Bachelor degree. This includes bachelors in sociology or a solid background in social sciences, including social science methodology. Both qualitative and quantitative research skills are highly recommended. Students should have successfully taken a course in multivariate analysis (around 12 ects) or have gathered the competences, intended in the mandatory course on Advanced Quantitative Analysis, in some other way.

Students holding a Flemish degree:
• All students who hold a Bachelor of Social Science (VUB-UGhent) are directly admitted
• All students who hold a bachelor degree in Sociology are directly admitted

International degree students:
• Students who hold a Bachelor of Social Science (or equivalent) or a bachelor degree in Sociology from a non-Belgian University, are admitted based on an evaluation of the content of their previous studies

Students with a professional or a different academic degree than stated above can enter the Masters degree after finishing a preparatory year. This programme is only available in Dutch. For more information on these programmes contact the learning path counsellor (tb.psw@ugent.be).

RESEARCH SKILLS

Both qualitative and quantitative research skills are highly recommended. Students should have successfully taken a course in multivariate analysis (around 12 ects) or have gathered the competences, intended in the mandatory course on Advanced Quantitative Analysis, in some other way. Thorough knowledge and skills are expected concerning:
• Descriptive univariate and bivariate analysis (frequencies, crosstabs, measures of position, dispersion, association, correlation and regression analysis)
• Inferential statistics (significance tests and confidence intervals)
• T-tests and analysis of variance (ANOVA)
• Multiple regression analysis
• Logistic regression analysis
• Factor analysis

LANGUAGE REQUIREMENTS

Ghent University requires a good knowledge of English (CEF B2-level or higher) in order to communicate and function in an academic context. Therefore all incoming exchange students are required to submit a language certificate which shows that they have acquired a B2-level in English.

You can submit one of the following documents:
• A TOEFL certificate: minimum score 510-559 (paper-based) or 87-109 (internet-based)
• An IELTS certificate: minimum score 6.0
• A TOEIC certificate: minimum score 785-944
• A Cambridge certificate: FCE, CAE or CPE
• A certificate of a university language centre: minimum level B2
• A proof that you are a native speaker of English (this can be a copy of your identity card/passport)
• A proof that you successfully finished a study programme of at least one year which was completely taught in English

Students with a degree from a Flemish secondary school are exempted.

For more information about the language requirements please contact the FCI administrator: Ms. Hilde Van Peteghem & Mr. Dries Ledoux (rio.psw@ugent.be).

Ghent University provides preparatory courses in English. For more information visit www.ugent.be/lw/uct/en
**DEADLINES**

International degree students:
- Students who require a visa have to submit their application dossier (hard copies) before March 1, 2019.
- Students who do not require a visa have to submit their application dossier (hard copies) before June 1, 2019.

Students holding a Flemish degree:
- No fixed deadlines apply. After November 15 (of the year in which the master program is started) they can no longer take up 1st semester courses.
- Late applications should be solicited with the Faculty from October 1. After March 1 they can no longer enrol for the ongoing academic year.

**TUITION FEES**

All information can be found via this link: www.ugent.be/tuitionfee

**NEXT STEPS: APPLICATION PROCEDURE**

Students can apply through oasis.ugent.be.
You can read what to do after receiving a letter of acceptance at www.ugent.be/enrolment

More information and opening hours of the Registrar’s Office at www.ugent.be/enrolment

**WHO TO CONTACT?**

If you have any more questions you can send an email to socio_englishmaster@ugent.be.
CAN I COMBINE COURSES OF THE PREPARATORY PROGRAMME WITH COURSES OF THE MASTER PROGRAMME?
This depends on the number of courses in your programme. Usually, students take up 60 credits per academic year, or 30 credits per semester. If your programme consists of less credits, you can ask for permission to combine the Preparatory programme with courses of the Master programme.

DO I HAVE TO SUBMIT A DOCUMENT AS A PROOF THAT I MEET THE INITIAL REQUESTED COMPETENCES?
No. It is your own responsibility to check the initial requested competences in the course specifications and to make sure you meet these requirements at the start of the academic year. You can find the course specifications in the Course Catalogue.

AM I ELIGIBLE FOR ONE OF THE MASTER PROGRAMMES?
The Curriculum Committee decides whether your educational background is sufficient to be admitted or not. They cannot make any decisions without a complete application package. If you want to know if you are eligible, you will have to follow the application procedure.

CAN I ASK FOR EXEMPTIONS?
Yes. If you think you have already earned most of the final competences of one (or more) courses, you can apply for an exemption. To request an exemption, you need to fill in the online application form.

CAN I APPLY BEFORE GRADUATING AT MY HOME UNIVERSITY?
Yes. You need to start the application procedure and submit your application package before the deadline. You do not have to wait until you have graduated. In this case, you need to hand in 1) an official declaration from your school/university confirming the expected graduation date and the exact name of the diploma that will be awarded and 2) your most recent transcript.

WHERE CAN I STAY DURING MY STUDIES?
For more information on renting a room and on the University Halls of Residence you can contact the Housing Office.
www.ugent.be/en/facilities/housing

WHEN DOES THE ACADEMIC YEAR START?
The academic year consists of two semesters. The first semester will start in September 2019 and end in February 2020. The second semester will start in February 2020 and end in August 2020.

FREQUENTLY ASKED QUESTIONS

Within the faculty 5 student counsellors and learning path counsellors are available for individual advice, training in study attitude, study planning and study skills, and guidance concerning specific study choices or matters particularly related to the chosen study or to talk about possible re-orientation.
