VLM_HAM_PDPOIII selection

Hamster_percelen ARENSTRIPPER

Small scale landscape

- Small plots
- Taluds
- Wood sides and hedges

Measure alfalfa:

- 4 years alfalfa
- 5th year wintergrain
- cut between 1/10 and 1/3

Measure hamster-friendly aftercrop

- After an early crop (winter barley)
- Rotates along plots with the crop
- Has to be sowed before August 4th
- Mix with Japanese oats

Measure fauna foodcrop

- Seedbearing crop
- Hamsters use it during winter, but pass by during summer

Measure graslandstrip-plus

- Perennial grassland with herbs
- $1x \leq \text{cut} \leq 2x$
- Max $\frac{1}{2}$ is cut at one time
- Surrounds measure alfalfa

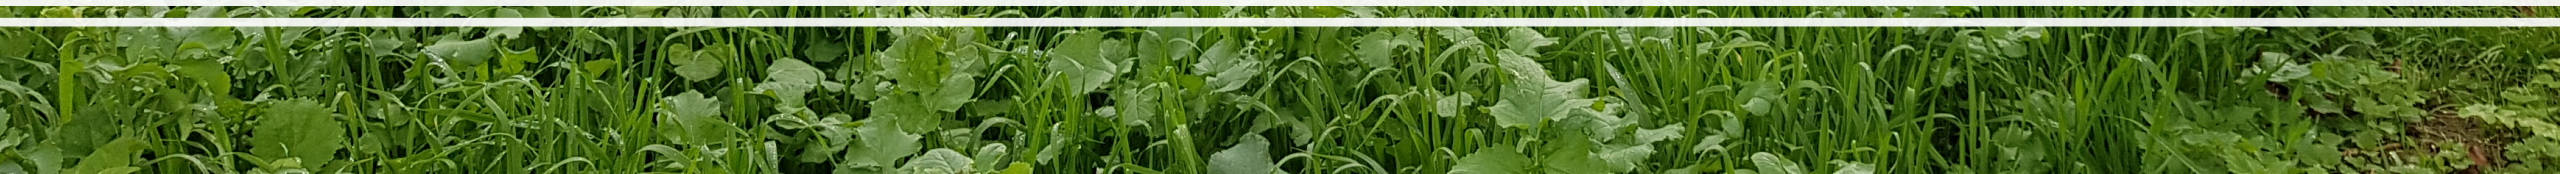

Hamster-friendly aftercrop

- Free seedmix
- Same as official management measure, but 1 year
 - 35 kg/ha Japanese oats
 - 2 kg/ha phacelia
 - 2kg/ha fodder raddish
 - 1kg/ha sunflower

October 19th 2020

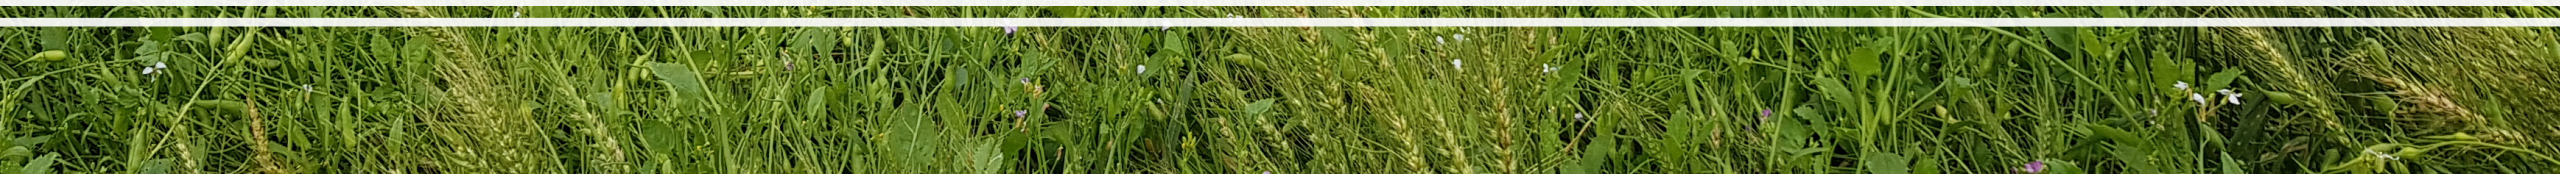

stripper-header:
stems stay on the field until September 26th
alternative for manure needed

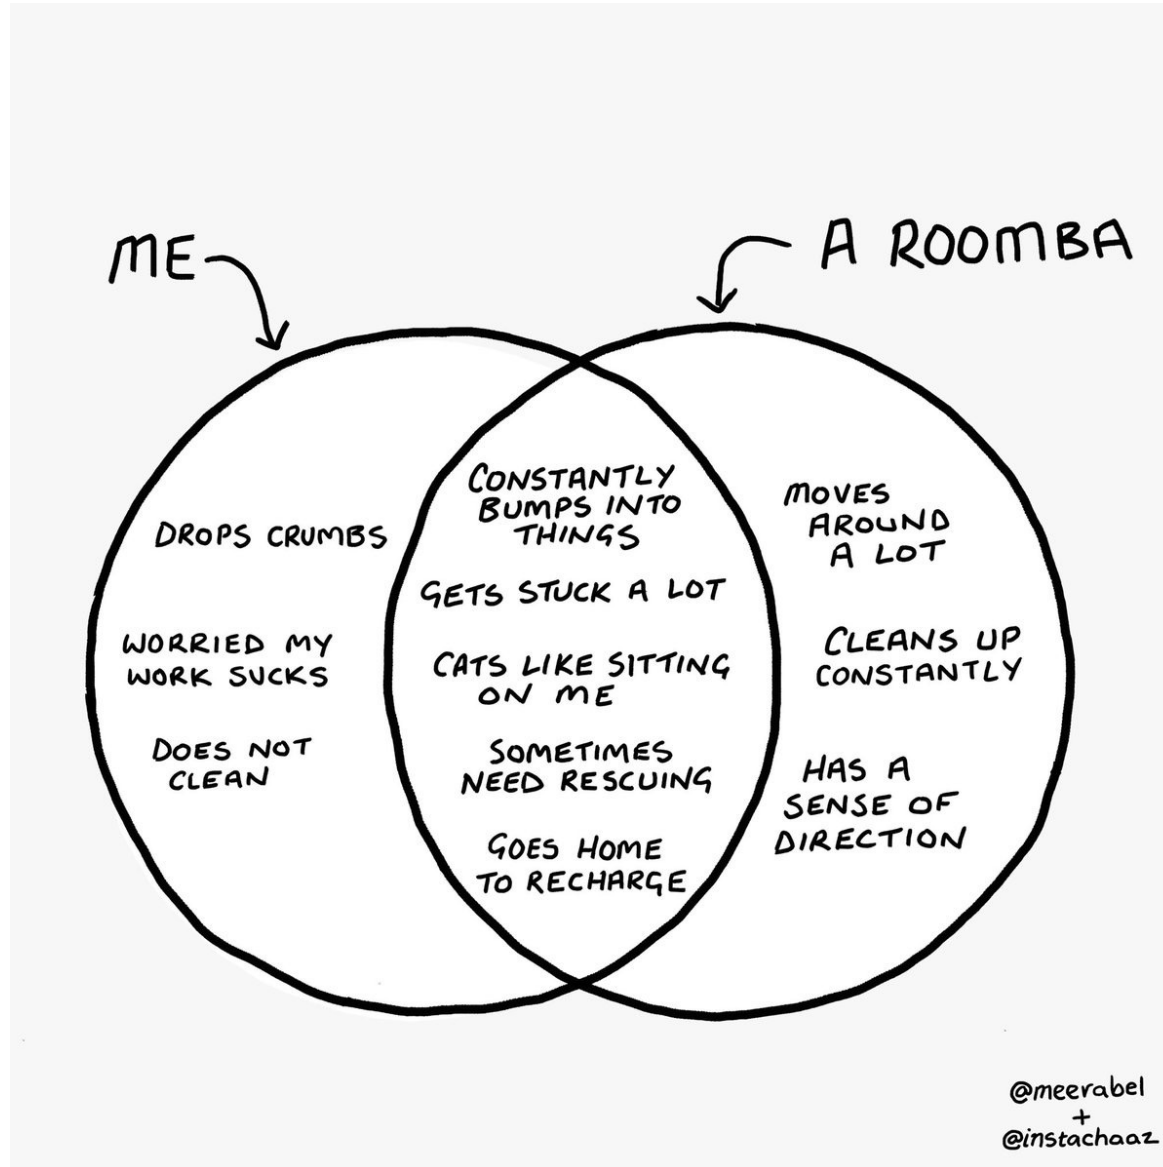

Extra (free) seedmix: grain, fodder pea, fodder raddish, sunflower
