TU	30							
WE	31							

- Fill in your exam schedule (oasis.ugent.be) on this calendar and count the number of available days you have, from the start of your exam period (on 19/08), for each course between two exams. Fill in these days on table ①.
- Count the number of days you have as from today:
 - > Evaluate for each week on which days you can do/plan your qualitative study work (weekends included).
 - > Decide for each day the number of hours that **you will certainly study in a qualitative way, not those that you wish you would study**, and fill in on the calendar (in the yellow column)
 - > Count these hours for each week.
 - > Convert the hours into days and write them in table ②. A whole day equals to an average of 6-8 hours quality work and a half day to an average of 3-4 hours quality work. Your support work is not taken into account! Three evenings of 2 hours for example count for an entire day. Of course you can also immediately count in entire and half days.
 - > Count all these days. Those are the study days you're sure of.

- Distribute these days over the different exams in table ③ so that you have studied every course qualitatively.
- Indicate on your calendar on which days or hours you will study which course.
- Stick to your planning and make use of your available days/hours to prepare your exams. If qualitative study hours are lost by unforeseen circumstances, reschedule these hours, by preference in the same week.
