

An introduction to the European Centre for Chirality

> our mission

is to provide a knowledge based service for applications requiring structural elucidation of chiral molecules.

.....

> our work

is based on high quality, flexible and confidential interaction working in partnership with our customers providing a natural extension to their own work place environment.

.....

The European Centre for Chirality (EC²) is based in Belgium at the **University of Antwerp** and **Ghent University** and is an exclusive alliance with **BioTools Inc.**

Together, the three organisations are the European Centre for Chirality.

The European Centre for Chirality is a unique blend of scientific expertise using the considerable knowledge and know-how within EC² to provide analytical services for chiral molecules using techniques of Vibrational Circular Dichroism (VCD) and Raman Optical Activity (ROA), collectively known as Vibrational Optical Activity (VOA).

Our service packages vary from single structure determinations to inclusive membership schemes designed to give you maximum choice and flexibility to meet your requirements and budget.

We understand the need for risk free, flexible products which is why we allow unused services to be carried over to the following year when extending your annual membership.

Details of our comprehensive product packages are overleaf.

EC² product packages

1

> Pay as you use method priced per sample:

- Complete AC (Absolute Configuration determinations) including full report **priced per sample**
- VOA measurements **priced per sample**
- VOA instrument access at daily rates
- Modelling services
- Feasibility studies
- VOA advanced and basic workshops

2

> Level 1 annual membership of EC²:

- Five samples measured for AC (Absolute Configuration determinations) including full analytical report
- VOA measurements
- Technical advice

Additional services at membership prices

- VOA instrument access at daily rates
- Modelling services
- VOA advanced and basic workshops

3

> Level 2 annual membership of EC²:

- Ten samples measured for AC (Absolute Configuration determinations) including full analytical report
- Ten VOA measurements
- Modelling services
- Technical advice
- Entry to VOA basic and advanced workshops (2 persons)
- 1 week priority instrument access
- 1 day consultancy

Feasibility studies may be offered on a case-by-case basis.

Contact

If you would like to discuss how EC² can support you and design a service packages that meet your needs please contact either:

Frank Trundle

(Managing Director BioTools Europe Ltd)

Tel (Main) +44 (0)1483 688300

Mobile: +44 (0)7760778610

e-mail: frundle@btools.com

Sergey Sergeyev

(Chief Operating Officer at EC²: located at the University Of Antwerp)

Tel +32 (0)322653386
